- Assisted in the development, testing, validation, and verification of the combined radiation transport and finite-element analysis multi-physics capability for the Engineering Campaign-7 Nuclear Survivability project [Pubs: [11,12](#)].
- Developed unstructured mesh human phantoms for health physics applications with MCNP6 [Pubs: [13,14](#)].
- *Acquired DOE Q-level security clearance and assisted on the analysis of weapons systems.
- Created a software visualization package for finite element geometries in MCNP simulations.
- Utilized high performance computing (HPC) systems and utilities for advanced physics simulations and analysis.

* Paperwork submitted June, 2016 for reinstatement of DOE Q-level clearance.
